1 - INTRODUCTION

- Nursing Diagnosis Risk for Surgical Site Infection (RISC) - nurses' perioperative care
- Underobserved in the nursing process of intraoperative period
- High rates of surgical site infection

2 - STUDY GAP

Research performed with evidences data from the postoperative period, without considering the intraoperative period.

3 - STUDY PURPOSE

NURSING DIAGNOSIS RISK FOR **SURGICAL SITE INFECTION (00266) IN** THE INTRAOPERATIVE PERIOD

Fernanda Lopes Cavalcante, RN; Vitor Rocha Moreira, RN; Beatriz Lopes Rezende Nunes; Graziele Ribeiro Bitencourt, RN, PhD; Priscilla Alfradique de Souza, RN, PhD

5 – RESULTS

The majority was composed by men (55.1%), older adults (51%), with mean age of 55.7 years old (Min: 18; Max:87), retired (26,5%), and incomplete elementary school (24.5%).
