	admission variables accorded high importance by medical school admissions personnel included: (1)

In light of these variables, it is important that you are able to step back and assess your developing profile

undergraduate grade point average, (2) MCAT scores, (3) letters of evaluation, (4) involvement in health-

related work experiences, (5) interviewing skills, (6) involvement in extracurricular activities.

as an applicant to health professions schools. What are the strengths of your developing application profile? What are areas in need of attention? What are ways you can improve your overall application?
